  - VII. Claims 55-60, drawn to a method of signal pre-processing, classified in class, 435, subclass 288.7.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-VII are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product i.e. the array composition of Invention I can be used to synthesize nucleic acids complementary to the nucleic acid bioactive agents.

A telephone call was made to David Foster on 9 May 2000 to request an oral election to the above restriction requirement, but Mr. Foster requested the Restriction Requirement be mailed.

Art Unit: 1655

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
